6 New Size Key Boards

We have updated and improved our range of cylinder and mortice key boards by compacting them into six new ones.

The six new space saving boards will replace the eleven old type, enabling you to free up valuable point of sale wall space and further enhance your business.

Same high build quality as previous range, with durable gloss laminated backing sheet attached to 12.5mm (1/2") thick board. The edging is complimented with a tough and protective black tape which also adds to the overall appearance.
