PHOENIX ULTIMATE GSP PICK SET

Code:

PLTP-ULTIMATE-GSP

The Peterson Phoenix Ultimate Government Steel Pick Set comes with Euro lock picks made of Government Steel, Stainless Slenders that are perfect for working with narrow key ways.

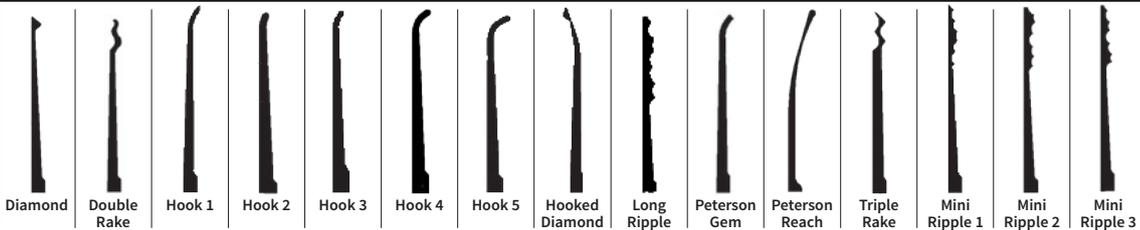

The Stainless Slenders are only about 0.015 inches thick, so they easily pass through these key ways. And because they are made from Government Steel, they do so from a position of strength, as well as fineness.

With the Prybar tension tools, the Deep Cut Access Picks, a spiral extractor and a mini-saw extractor, you will enjoy one of the best pick sets on the market that will help you defeat almost any lock for many years to come.

Main Benefits:

- It includes **three red-handled Deep Cut Access Picks** that are going to solve any problem you may encounter when a key has deep cuts next to the bow. Shorter in height than standard picks, they increase your manoeuvring room when picking those back pins.
- The set contains **Euro lock picks made of Government Steel**.
- It contains seven **stainless steel slenders** that are perfect for working on **“narrow” key ways**.
- You will get the Peterson Knife tool for opening padlocks.
- **Government Steel**. Peterson’s own high-strength material. Each of these picks are durable and reliable. They are also rust-resistant and corrosion-resistant, which makes them an even smarter choice if you have to work during bad weather.
- **Plastic handles and tensile strengths** of these picks give you an unparalleled feel on the lock.
