danalock

DANALOCK v.3

The **Danalock v.3 residential smart locks** replace the traditional home door key with an electronic system that allows you to use your smart phone to control your door, your guests and your home.

Automatic Unlock. No need to put your groceries down, Danalock V3 detects your arrival and unlocks the door for you. For added convenience, you can configure the Danalock to re-lock the door after entering.
Flexible Access Control. Grant access to other users or bridge your Danalock, so you can lock, unlock and monitor it from anywhere keeping track of each locking and unlocking of the door. You can also create an unlimited number of digital keys for your family, friends, guests or helpers such as a housekeeper or contractor, program each user's access level by choosing permanent, recurrent or temporary access.

Usage Alerts. Know who enters and exits your home. Receive real-time notifications when your smart lock is used.

Easy to fit. Depending on your door type, you will either have to attach a mounting plate to the door or replace your locking cylinder with the one provided. The Danalock V3 will then fit directly on the cylinder through the tail-piece supplied.

Extremely secure. The Danalock V3 smart lock is based on the latest development within data security and smart home technology. It uses the most advanced encryption method for transferring data (AES 256), the same encryption technology used by government and military to keep information secure.

Home Automation Protocols. The Danalock V3 comes in versions that support the major smart home gateway systems, including Apple HomeKit, Z-Wave Plus, Zigbee and Bluetooth. The Danalock V3 can be the trigger of your smart home devices. It can turn the light on and off, put your favourite music on and more when entering or leaving your home. The **Danalock Airbnb integration** enables you to share mobile keys directly to the guest's smartphone for the period of time that the home has been rented though the Airbnb platform. After the stay the mobile key expires.

Z-WAVE PLUS
Zigbee
Works with **Apple HomeKit**

How it works

The Danalock v.3 residential smart locks only work via your smartphone using Bluetooth.

A. At the door: via Bluetooth with your phone or fob (Danafob coming soon).

Blue Tooth

Bluetooth SMART

leave

return

Bluetooth range 0 - 5 m
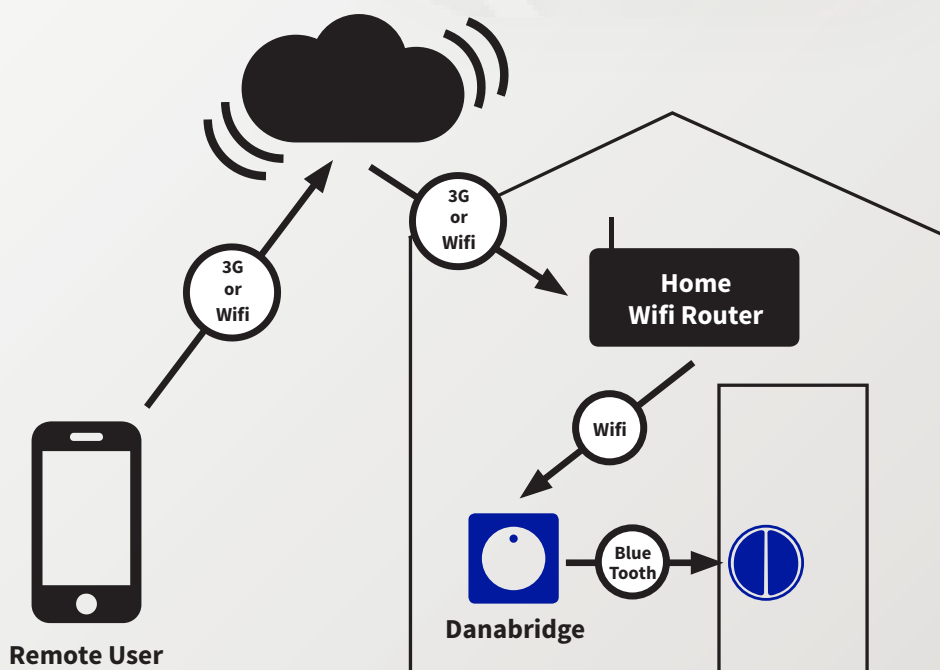

Auto unlock zone 500 - 1000 m

Automatic Unlock.
No need to put your groceries down because Danalock v.3 detects your arrival and:
• Automatically unlocks the door when you approach it.
• Automatically locks it when you leave.

B. Control Danalock remotely: you can control Danalock remotely thanks to a WI-FI connected bridge in its vicinity (Danabridge coming soon)*. Plug the Danabridge v.3 into a power outlet and connect it to your home Wi-Fi in the Danalock app – then it is ready to be paired with your Danalock smart lock. Remember to place it within Bluetooth range.
